Responsibilities
Responsibilities
Attract customers with an industry standard cost of conversion
Convincing customer to purchase
Negotiating a high price
Maintain finances
Create a numerical representation of a chosenpersonality
Represent a person's knowledge
Create the Chatbot
Create network that informs chatbot
Develop a convenient user interface (Text & Audio)
Enable the chatbot and GAN to communicate with one another
Enclose the hardware in a durable shell
Arrange the necessary hardware
Store information provided by the profilers and software team
Must possess battery and charger
Handles Q & A
Records and facilitates refund requests & Returns
Sends callers to relevant departments
Contacts customers after purchase

Constraints	Duty Required?
Must remain within 10% of budget; conversion cost must be within 20% of industry standard	
Each month's conversions must either match or exceed that of the previous year's	
Price cannot fall below an established minimum;	Yes
Must be in accordance with GAAP & legal constraints	Yes
Use the Big Five Model	Yes
Resultant chatbot and Gan must pass a Turing Test 50% of the time; approximation must be storable within a database	Yes
Resultant chatbot and GAN must pass a Turing Test 50% of the time	Yes
Resultant chatbot and GAN must pass a Turing Test 50% of the time; incorporates PyPsych library	Yes
User must be able to send questions and receive answers within 30 seconds using either text or audio	Yes
Communication must occur within five seconds; the GAN informs the chatbot	Yes
Withstands temperatures of up to 160 degrees, Can withstand blunt force equivalent to 1,200 Newtons	Yes
Should weigh three pounds	Yes
Must include all information provided by software designers and profilers	Yes
Device must weigh roughly three pounds	Yes
Wait times of < 5 minutes; Average satisfaction rating of > 2.5 stars (out of 5)	
Wait times of < 5 minutes; Average satisfaction rating of > 2.5 stars (out of 5)	
Wait times of < 5 minutes; Average satisfaction rating of > 2.5 stars (out of 5)	
Wait times of < 5 minutes; Average satisfaction rating of > 2.5 stars (out of 5)	

Score	Penalty (%)	Criteria		
7	10	Exceed budget by 1% or conversion cost by 5%		
5	4	Is applied after third straight month; compounds monthly		
4	NA	NA		
16	20	Breaks the law		
15	NA	NA		
14	25	Penalty applied for every 5% deviation		
17	25	Penalty applied for every 5% deviation		
18	25	Penalty applied for every 5% deviation		
13	15	Penalty applied for every 5% deviation		
12	10	Penalty applied for every 3 second ecess		
11	8	Penalty applied for every 10% deviation		
10	2	Penalty applied for every .6 lb deviation		
9	10	Penalty applied for every 5% of data lost		
8	2	Penalty applied for every .6 lb deviation		
3	5	Penalty applied for each minute beyond 5 or for each .5 stars below 2.5		
2	5	Penalty applied for each minute beyond 5 or for each .5 stars below 2.5		
1	5	Penalty applied for each minute beyond 5 or for each .5 stars below 2.5		
6	5	Penalty applied for each minute beyond 5 or for each .5 stars below 2.5		
Potential Score = 171				
Passing Score = 137
